

# BLYMUM

## COMPANY PRESENTATION

2021-2022

[www.blymum.com](http://www.blymum.com)

BLYMUM is an Italian company based in Milan providing services, products and knowledge for those Companies specialized in developing, producing and marketing medical devices, food supplements, functional & novel foods, nutraceuticals and cosmetics, and for those Companies strategically focused on social and workplace sustainability.

Our mission is to contribute to people's health, physical and psychological wellbeing, longevity and beauty.

# Smart Scientific Sustainable Solutions

# BLYMUM Services and Products

## SERVICES

BLYMUM offers professional support

to Pharmaceutical, Food, Healthcare and other Clients in the following areas:

Clinical Trials Management; Regulatory Compliance; Wellbeing Management; Sustainable Impact Modeling; Change Management & Mentoring

## PRODUCTS

In parallel, we are directly involved in product innovation processes.

The BLYMUM distinctive feature lies in the development of Physiological Modulators, that are scientifically proven solutions for specific human psycho-physical problems, pathological phenomena and adverse living and working conditions:

BLYMUM Food Supplements; On-demand Formulation Development

Livella<sup>®</sup> is the Blymum distinctive philosophy and methodology to self-management, life habits correction, health and wellbeing improvement

We support the Sustainable Development Goals of the United Nations and fully adhere to the SDG 3 Good Health and Wellness for People

Livella<sup>®</sup> original mindset is inspired by the [physiological modulation theory](#) applied to the human organism

# Physiological Balance Management

# CLINICAL TRIALS MANAGEMENT

## SERVICES

Our Clinical Trial Management is aimed at driving predictable and effective delivery of the clinical value assessment pertaining to food supplements, functional foods, novel foods, nutraceuticals, cosmetics and medical devices. We select professional partners, organize and directly accomplish all activities to design, develop and carry out a Clinical Investigation to fulfill the Clients' requests.

To ensure the scientific validity and reproducibility of results, all members of our Scientific Committee are internationally recognized Opinion Leader Scientists, from primary Italian and international Academic Institutions. The Clinical Investigations are conducted in collaboration with the most important Universities in Italy, and throughout academic collaborations in USA, UK, and Switzerland, in accordance with the worldwide requirements, in primis with the provisions of the Declaration of Helsinki (current version), the Good Clinical Practice Standards from the ICH, the Federal Data Protection Act and the Italian Personal Data Protection Code.

BLYMUM carries out Clinical Trials Design & Project Management activities, throughout all key phases: Experimental Design; Dossier Set-up; Participant Enrollment; Treatment & Monitoring Support; Clinical Data Management.

# REGULATORY COMPLIANCE SERVICES

## SERVICES

Regulatory compliance deals with the set of guidelines that an organization is required to follow in accordance with the Law. Ensuring that Your products meet all applicable regulatory requirements for commerce and advertising activities is an increasingly complex and critical effort.

BLYMUM has an excellent knowledge of Italian, EU and international legislation to be respected for safe and legal dealing concerning food supplements, functional foods, novel foods, nutraceuticals, cosmetics and medical devices. We deliver regulatory support throughout the whole above-mentioned products lifecycle; we update, vary and renew the above-mentioned classes of products. National and European registration and maintenance procedures are available as well as due diligence activities and licensing support.

Furthermore, we provide regulatory compliance services for the above-mentioned product classes, integrated with three specific business practices: Intellectual Property Management; Bid Management; Marketing and Communication.

# WELLBEING MANAGEMENT

## SERVICES

The goal of BLYMUM Wellbeing Management services is to give a focused support to people's quality of life, health ability to work and to interact within communities. We fully adhere to the United Nations Sustainable Development Goal 3 "Good Health and Wellbeing for People".

Our Livella® Self Wellbeing Management Program is an on-line counseling, mentoring and coaching service for individuals and organizations, with the aim at professionally supporting the physical, mental, working and relational wellbeing in an integrated fashion. The Program provides tangible benefits for people's health and life, and for comfort and organizational performance.

We carry out the Livella® Self Wellbeing Management activities throughout four Key Lanes: Body, Mind, Work and World. Each Mentee is supported along with its Individual Track that defines his/her customized growth and wellbeing improvement.

Livella® Self Wellbeing Management is designed as a Smart Working Program.

# SUSTAINABLE IMPACT MODELING

## SERVICES

Our goal is to help enterprises to achieve a sustainable development, to find the right balance between resilience, efficiency and innovation. We give support to companies and organization focused on sustainable strategic development, in terms of profitability, ethical behavior, social justice and environment.

Within the food supplements, functional foods, novel foods, nutraceuticals, cosmetics and medical devices markets, we design and develop Your business models according to UN Sustainable Development Goals.

Our distinguishing competency is the ability to work within complex systems and to model strategic and operational business solutions in a very short time, activating a vast range of creative and scientific techniques, collaborative innovation methods, management knowledge and specific sector competencies.

BLYMUM approach exploits business modeling based upon modular systems that are both product-oriented and people-oriented and their combinations: found on the Sustainable Value Innovation methodology (SVI-ALDEHYDE MBS<sup>®</sup>, by CINNAM SRL) and aimed at contributing to the harmony between the company's internal and external environment, people's wellness, business development and the overall sustainable economic and human growth.

# CHANGE MANAGEMENT & MENTORING

## SERVICES

Do You spend a lot of time on developing business strategies that remain only a priority of Your senior management? Do Your people need empowerment in areas such as green economy, social responsibility, stress management, general wellbeing and nutrition? Are You aware of the need to continuously face new business challenges in a structured and systemic way, unlocking the technical, managerial and creative potential of Your human resources?

We help You to design and carry out engaging transformation projects and programs that could face and resolve Your problems. Our experts have a wealth of experience in designing, projecting and managing different scales of Change Management Projects, based upon the integration of three parallel paths: Team Collaborative Workshops, Individual Mentoring and Knowledge System Building. Our Change and Innovation Programs ensure the internal alignment and the creation of multidisciplinary teams that can break through silos and foster cross-disciplinary collaboration.

Innovation Team Working Programs are oriented on identifying, developing and deploying the innovation skills and creative talents of participants, starting from the assessment approach adopted by Tom Kelley (Ten Faces of Innovation, 2008). The goal is to create the "optimal" teams for Your innovation projects.

# BLYMUM FOOD SUPPLEMENTS | RUBENFLUX® Donna

## Food Supplement to Counteract Anemia
